Chasing Zero Infections Series 2017

- HAIs • Antibiotic Stewardship •
- Patient Safety Culture •
- Patient and Family Engagement • Physician Engagement •

FHA HIIN Chasing Zero Infections Series Overview

The FHA HIIN Chasing Zero Infections Series will provide hospitals with the latest information, practices and assistance in eliminating hospital acquired infections (HAI). This series will focus on CAUTI, CLABSI, SSI, VAE, MRSA, CDI, Sepsis and Antibiotic Stewardship and will include didactic webinars, interactive coaching calls and in-person meetings. Additionally, cross cutting topics such as patient and family engagement, physician engagement and patient safety culture will be discussed as strategies that boost improvement efforts and sustainability. The series will also include the opportunity for hospitals to interact one-on-one with national experts for individual coaching and support.

Why Participate? Benefits include:

- Participate in free education via webinars, coaching calls and meetings
- Learn about the **current evidence** and ideas on how to implement it
- Hear what other hospitals are doing to reduce infections
- **Network** with colleagues doing similar work to reduce HAIs
- **One-on-one coaching** with national expert to address hospital-specific needs

Suggested Audience:

Infection Preventionists and all clinical disciplines including physicians, nurses, respiratory therapy, pharmacists, etc.

How to Participate:

The FHA HIIN Chasing Zero Infections Series will begin in February 2017 and continue into 2018. A schedule of 2017 events is below. Check the weekly **FHA MTC HIIN Info Upcoming Events** email for webinar and in-person event details and registration.

Didactic Webinars	Interactive Coaching Calls	In-person Meetings
Feb. 14 – MRSA (Slides Recording)	Mar. 21 – CAUTI (Slides Recording)	May 25, 2017 - C. diff, MDRO, Antibiotic Stewardship (Presentations)
Apr. 11 – SSI (Slides Recording)	Aug. 8 – C. difficile (Slides Recording)	Nov. 16, 2017 - Hand Hygiene, SSI, HAIs Signature Grand in Davie, FL (Presentations)
Jun. 6 – CLABSI (Slides Recording)		
Sep. 12 – Sepsis (Slides Recording)		
Oct. 24 – SOAP UP/Hand Hygiene (Slides Recording)		

Data Elements:

Data measures will include NHSN measures for HIIN topics on infection rates, standardized infection ratios (SIRs) and utilization ratios. Hospitals who report data to the NHSN will have their data flow to the HIIN Comprehensive Data System automatically via conferring rights.
